

Muasami

I wanted to work for others since long but I was not getting that chance, until I got the fellowship.

And when I got this fellowship, I got a courage that I could do it now. Through the fellowship, I met many people and gained confidence. I have improved in both personal and professional sides. Also, in this fellowship, we got to take the Harappa Education courses, which helped me a lot. Through this fellowship, I have visited many districts and talked to many care leavers, so that I get to know how care leavers live in each and every district, how their condition is there, and through this fellowship I got a chance to talk to the care leavers who live outside of India, which has given me a lot of courage that how the people of care leavers outside India live there, what is the condition there.

So all these things make me very confident in my life. Due to which I am very happy. And all the fellows I have met have become one family. I will probably never be able to forget this in the family because each and every fellow has come through a lot in their own life, listening to their life's journey, all the sorrows in my life seem a little less
